Chapter Quotes

Is the real barrier... that books can't possibly compare with exciting multimedia products for our attention? Let's face it: Screen media is the elephant in the room. True understanding of children's literacy in the twenty-first century is impossible without turning to face this creature and take a long look.

-Lisa Guernsey and Michael Levine-

Books and screen are now bound up with one another whether we like it or not. Only in patiently working through this entanglement will we be able to understand how new technologies will, or will not, change how we read.

-Andre Piper-

Passage
Reading

Discussion

Video

"Once upon a time, there was a dark, enchanted forest where no light could enter and no creature could leave. It was in this long-accursed place that a very tiny, very shy toad lived under a very large, most unusual toadstool. The toadstool talked! Every night the toadstool whispered secrets to the toad, and every morning the toad told all the secrets to the sad princess whom he loved in vain."

Nearpod Experience

Further Discussion

1. Discuss what it felt like to have the story read to you.
2. What words from the story might you NOT hear in everyday conversation?

1. Current Recommendation from the AAP
 2. This is NOT easy!
 3. HOW do you communicate this with families?

Emotion, empathy, and human connection are
the cornerstone of development.

Can technology achieve this in the same way a
paper book can?

1. Current Recommendation for by AAP

2. This is NOT easy!

Emotions play a huge role in this. Whether using technology or physical books. How can we establish a connection with others in the age of technology?

3. What is Maryanne Wolf's ideal reading world?

The Great Screen Debate

How often?

Which activities?

eBooks or books?

Considerations

TinkRBook

The Solution?

Apps that claim to be educational often are not created by credentialed professionals.

Apps are often centered around games.

eBooks can be beneficial if interactive.

TinkRBook

The dirty duck loops back to the decision point.

The dirty duck loops back to the decision point.

"I have no magic formula for implementing my considerably shorter two-hour maximum recommended allowance at home, and there will be many individual differences among children.

What I seek is a day that preserves time for child-directed play and human laps and a night in which the rituals of storytelling and physical books dominate".

-Maryanne Wolf
